# Savin C2820

In today's competitive business climate, color is no longer a luxury...it's a business requirement. And, with the Savin C2820, you can now equip your office or workgroup with the power of full color. Featuring standard copying, printing, scanning and optional faxing, the C2820 also offers everything you'd expect of a high-performance multifunctional system: fast output speeds, professional image quality, reliable paper handling and productive finishing options. And, when your documents need color to hammer home the point, the C2820 does it with the click of the mouse or push of a button.

## Looks Good On Your Network

The Savin C2820 features a variety of ways to connect to your network, so everyone on the network can take advantage of the C2820's powerful document production and distribution capabilities.

Swiftly generate prints and copies – 28 ppm for black and white and 20 ppm for full color.

Conveniently collaborate with other colleagues using the C2820's advanced scanning function; simply scan documents – full color or black and white – then send them to folders or FTP servers, or as e-mail attachments.

Send and receive faxes directly from the desktop or via the Internet and eliminate costly phone charges.

Store documents – copies, prints, hardcopy scans and fax receptions – in the C2820's large Document Server, then view, manage and manipulate them from the desktop.

Monitor and manage the C2820 using Web Image Monitor from your workstation: check system status and availability, get alerts when toner or paper levels are low, and view and manage files stored in the Document Server.

## Makes A Bold Statement

Adding color to key proposals or presentations will get them noticed and acted upon much faster than black and white documents. And you can create attention-getting newsletters, brochures or targeted direct mail pieces – in-house – complete with full color photos, charts or graphs. Plus there's no financial penalty when you do need plain black and white documents – the Savin C2820 produces copies and prints at virtually the same cost per page as comparable black and white only systems.

## Redefines Business Color

With the Savin C2820, business color becomes more than “nice to have”; it becomes an affordable “must have” for offices and workgroups everywhere.
